Angkor Wat was built in the first half of the 12th Century and estimated construction time of the temple is 30 years by The King Suryavarman II, dedicated this Temple to God Vishnu who is the Leader of the western cosmic region. That is why The Angkor Wat is facing West instead as the most Hindu temple facing east all over the world.

We have to mind that to enter the third enclosure up to the centre tower of the

Five towers of Angkor Wat, no one allowed with sleeveless top clothes. Since on those days the third enclosure used only by The King Suryavarma II , who built this Angkor Wat, the Kampucheans still respect him and for that reasonnot allowing the tourists not covered the upper body fully covered by proper clothes regardless of men and women)

It was built about mid 12th century to early 13th Century (1186) by the King Jayavarman VII dedicated to his motherJayalakshmi.

Ta Prohm is the largest monument in the Angkor Complex which included 260 statues of Gods, 39 Towers with Pinnacles and 566 groups of residences. The center of the monuments is reached by a series of towers connected with passages. This arrangement forms a sort of scared way into the heart of the monument.

Ta Prohm is the undisputed capital of the kingdom of the Trees. Shrouded in dense jungle the temple of Ta Prohm is ethereal in aspect and conjures up a romantic aura. Fig, Banyan and KAPOK TREES SPREAD THEIR GIGANTIC ROOTS OVER STONES, PROBING WALLS and terraces apart, as their branches and leaves intertwine to form a roof over the structures.
